Lesson Plan Description:

Chair Pose Modifications

[br]

Yoga Block: Place a block between your thighs.

Palms: Join palms overhead.

Wall: If balancing in this pose is a challenge, use a wall behind to support the hips in [chair pose with the wall as a prop](#).

Stiff Shoulders: If your shoulders are stiff, there's no need to raise them above your head. Instead, simply stretch your arms in front of you in alignment with your chest.

Place Hands On Thighs: If your chest and shoulders are stiff, start with placing your hands on your thighs, palms facing down. Then slowly raise arms overhead.

Wider Stance: If bringing your ankles and knees together is hard on the thighs, widen your stance, to begin with.

Pregnancy: If you're pregnant keep your feet hip-distance apart while practicing Utkatasana, for better grip and stability.
