|---|-----------------------|--|
|  | <p>Hero</p> | <p>Sit with buttocks on heels. Feet slightly wider than hips with tops of feet flat on floor. Angle big toes slightly toward each other. Release shoulder blades away from ears.</p> <p>Benefits: Stretches quads, thighs, knees, and ankles. Helping build flexibility in knees, ankles, and thighs. Improves posture. Improves breathing.</p> <p>Video: https://www.youtube.com/embed/py0vL4mc09w?rel=0</p> <p>Modifications: A) Baby Hero: Sit on knees and shins. Place feet with soles pointing behind you with toes touching the mat. B) Sit On Heels: Bring feet close to each other. Place them one upon the other with soles pointing backwards. Placing sit bones on heels raises hip higher. This brings pressure on ankles, so do this modification carefully. C) Practice Uddiyana Bandha: Place hands on thighs. Push hands downwards on knees and raise chest and upper abdomen upwards. Take a deep inhale through your nose and exhale quickly and powerfully. Exhale all the way until the end of the breath. This stretches diaphragm to its most expanded position. At end of your exhale, pull belly in as if you are trying to bring navel to touch your spine. Keep belly like this while taking no further breaths. Release belly. D) Raised Arms: raise arms above shoulders with fingers interlocked and gaze up.</p> <p>Precautions : Knee or ankle injury.</p> |
|  | <p>Hero Side Bend</p> | <p>Sit with buttocks on heels. Feet slightly wider than hips with tops of feet flat on floor. Angle big toes slightly toward each other. Release shoulder blades away from ears. Interlock (or hold hands) and raise them overhead. Bend to the side. Hold. Repeat on other side.</p> <p>Alternatives: Hero. Child. Extended Child.</p> <p>Benefits: Stretches thighs, knees, ankles. Releases stiffness in legs/low back.</p> <p>Video: https://www.youtube.com/embed/py0vL4mc09w?rel=0</p> <p>Modifications: A) Bolster or block between legs. B) Only raise one arm overhead.</p> <p>Precautions : Knee or ankle injury.</p> |

Lesson Plan Description:

Why such devotion to such a small area of the body?

Because a strong *rectus abdominis* (core) has a myriad of glorious benefits such as:

- Improved balance and stability
- Prevention of back problems
- Strengthened diaphragm which plays an essential role in deep breathing
- Improved digestion
- Improved heart health (excess fat around the belly is dangerous)
- Better posture (a strong core keeps your back stable which improves posture)

Weakness in the core can result in:

- Lower back pain (a whopping 1 in 4 people experience regular lower back pain).
- Over rotations in the vertebrae of the lower back (which can lead to degenerative disk disease and arthritis).-
- Digestive fires being weak (this can cause chronic exhaustion because you're not absorbing nutrients properly).

If you don't know how to get centred in your core, you can easily turn into a doormat for anyone with a strong personality. With a weak core you can become easy pickings for anyone who wants to push you off balance, whether it's a controlling family member or an advert on the TV trying to get you buy something that harms your body.-

The good news is that every asana is potentially a core-strengthening exercise, if you engage your core (pull abs toward spine). And even more good news is that core abdominal strength improves nearly every pose, offering a sense of balance and ease.
