 <p>Chair Forward Bend I</p>	 <p>Chair Arms Up</p>	 <p>Chair Centering</p>			

Lesson Plan Description:

This is a great 5 to 15 minute class to do at your desk when your neck gets tight. Or on the couch while watching TV (even better if you turn the TV off). -Just like traditional Sun Salutations, you can vary the pace you move through the poses.-

Feel The Ground Beneath You

Most of us in this crazy, fast world don't feel very secure and stable physically or mentally. Practicing Sun Salutations is a great way to become grounded by being aware of the ground beneath us. Feel roots growing under your feet. The longer you stay in a pose, the deeper the root grows and the more grounded you become.

Invent Your Own Sun Salutations

Use your tuition to come up with your own variations of Sun Salutation. It's one of the easiest sequences to spice up. There are no rules and no right or wrong. Just let your hair down and unleash the chair poses within.

Mantra Chanting

Adding mantras to Sun Salutations is a whole lot of fun.-It also adds a spiritual and meditative aspect to the practice. Come up with your own mantra or pick one below.

"Aum"

"May there be peace for all."

"Darkness gives me an opportunity to shine."

"Where I am right now is exactly where I need to be."

"I am the light I wish to see in the world."
